The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

- 1 This action is responsive to the amendment filed on May 20, 2005.
- The cancellation of claim 2 is acknowledged. Pending claims are 1 and 3-70.
- Claims 1, 3-8, 10-11, 22-47 and 55-70 are rejected under 35 U.S.C. 103(a) as being unpatentable over Laurent et al. (US 2002/0046431 A1) in view of Lim et al. (US 6,461,391 B1) for the reasons set forth in the previous office action mailed on 11/17/2004.
- Claim 48-54 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Laurent et al. (US 2002/0046431 A1) and Lim et al. (US 6,61,391 B1) and further in view of Cottar et al. (US 2001/0023514 A1) for the reasons set forth in the previous office action mailed on 11/17/2004.
- 5 Claims 9 and 12-21 are objected for the reasons set forth in the previous office action mailed on 11/17/2004.

Response to Applicant's Arguments

6 Applicant's arguments filed 5/20/2005 have been fully considered but they are not persuasive.

With respect to the rejection of claims under 35 U.S.C. 103(a) over Laurent et al. (US' 431 A1) in view of Lim et al. (US' 391 B1), Applicant argues that there is motivation or suggestion to combine the references. Further, Applicant agues that the nature of the problem to be solved does not supply a reason, suggestion or motivation to combine the references.

The examiner respectfully disagrees with the above arguments because the use of patents as references is not limited to what the patentees describe as their own inventions or to the problems with which they are concerned. They are part of the literature of the art, relevant for all

Application/Control Number: 10/735,524

Art Unit: 1751

they contain. "In re Heck, 699 F.2d 1331, 1332-33 216 USPQ 1038, 1039 (Fed. Cir. 1983) (quoting In re keelson, 397 F.2d 1006, 1009, 158 USPQ 275, 277 (CCPA 1968)). Further, a reference may be relied upon for all that it would have reasonably suggested to one having ordinary skill in the art, including non-preferred embodiments. Merck & Co. v. Biocraft Laboratories, 874 F.2d 804, 807, 10 USPQ2d 1843, 1846 (Fed. Cir. 1989); In re Fracalossi, 681 F. 2d 792, 794 n.1, 215 USPQ 569, 570 n.1 (CCPA 1982); In re Lamberti, 545 F. 2d 747, 750, 192 USPQ 278, 280 (CCPA 1976); In re Boe, 355 F. 2d 961, 965, 148 USPQ 507, 510 (CCPA 1966). In this case Laurent et al. (US' 431 A1) as a primary reference teaches a composition comprising oxidation bases of para-phenylenediamine compounds having a heterocyclic radical (see page 10, formula (!) and page 11, paragraph, 0270). Lim et al. (US' 391) as a secondary reference clearly teaches the claimed formula (I) (see col. 2, formula (1)). It is further taught by Lim et al. (US' 391 B1) that the quaternized pyrrolidine compounds are suitable primary intermediates for hair coloring compositions for providing good oxidative coloration of hair such as light fastness, fastness to shampooing, fastness to permanent wave treatment and suitable for providing a wide variety of different color shades with various primary intermediate and coupler compounds (see col. 2, lines 13-20). Therefore, there is a sufficient motivation to a person of the ordinary skill in the art to be motivated to substitute para-phenylenediamine oxidation bases of Laurent et al. by the cationic tertiary para-phenylenediaines of Lim et al., with the reasonable expectation of success for providing good oxidation coloring of hair. Therefore, the rejection is proper and the prima facie case of obviousness has been established.

With respect to the rejection of the claims under 35 U.S.C. 103(a) over Laurent et al. (US' 431 A1) in view of Lim et al. (US' 391 B1) and further in view of Cottard et al. (US' 514

Application/Control Number: 10/735,524

Art Unit: 1751

A1), Applicant argues that there is motivation or suggestion to combine the references.

The examiner respectfully disagrees with the above arguments because Laurent et al. (US' 431 A1) as a primary reference suggests the use of anionic polymers in the dyeing composition (see page 21, paragraph, 0466). Cottard et al. (US' 514 A1) as a secondary reference in analogous art of hair dyeing formulation, teaches a composition comprising anionic amphiphlic polymers containing at least one hydrophilic unit formed from (C10-C30)alkyl esters such as lauryl methacrylate and acrylic acid (see page 3, paragraphs, 0052-0057), wherein the anionic polymer comprising at least one hydrophilic unit and at least one ally ether unit containing fatty chain corresponds to the formula (I) which is similar to the claimed formula (I) as claimed (see page 2, paragraphs 0044 and 0045). It is further taught by Cottard et al. that the polymers containing at least one fatty chain providing good oxidative coloration of hair such as light fastness, fastness to shampooing, fastness to permanent wave treatment and suitable for providing more chromatic shades (see page 1, paragraph, 0007). Therefore, there is a sufficient motivation to one having ordinary skill in the art to be motivated to incorporate the anionic amphiphilic polymers of Cottard et al. in the composition of Laurent et al., with a reasonable expectation of success for providing good oxidation coloring of hair. Therefore, the rejection is proper and the prima facie case of obviousness has been established.

7 THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 1751

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eisa B. Elhilo whose telephone number is (571) 272-1315. The examiner can normally be reached on M - F (8:00 -5:30) with alternate Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra Gupta can be reached on (571) 272-1316. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
